

**ITB 2021-02**

**FLORIDA KEYS MOSQUITO CONTROL DISTRICT**

**QUESTIONS & ANSWERS**

1. Does this site need a pump?  
We have a pump that moves Jet A into the aircraft from the tank. We don't have a pump to fill the storage tank.
2. How large is the tank/how many gallons?  
Storage Tank is 4000 gallons. Fillable to about 3700 gallons.
3. Are you interested in a fixed price for the 60,000 Gallons or the life of the contract?  
We purchase approximately 60,000 gals per year, at a minimum of 2000 gals per order. Please submit your bid proposal based on what our cost would be on 2/25/2021 as stated in the bid specs. If that is a fixed price, please specify that in your proposal.
4. Can you take fuel off of Transport or will you need a tank wagon/short truck?  
We should be able to take from transport. See aerial photo below.
